## Using redundancy and organizational cues to identify the main idea

**Woman:** How do you like your new apartment, James?

**Man:** Well, I enjoy living downtown, but I don't like that my apartment is so small. I want to get a bigger one, but rent in the city is so expensive!

**Woman:** I think so, too—that's why I bought a place out of town. It takes me longer to get to work, but my house in the country has a lot more space.
